SYLLABUS

Course Description

Building on what is learned in ED 451, this course further explores and develops **appropriate teaching and learning strategies** to support all types of students in the classroom. Examines **evidence-based instructional practices** to understand how people learn and examines differentiated instruction through, among others, the concept of multiple intelligences and strength-based assessment and instruction. Assists teachers in identifying **systemic structures** that impede student learning and developing advocacy skills to break down these barriers. ED 452C covers **classroom management, collaboration with related services professionals and families, assistive technology, and transitions**. (Meets content-pedagogy requirement for professional teaching certification).

Course Objectives

These objectives remain consistent across each of the three parts to the ED452 series and they will build upon each other throughout. The readings, activities, and assessments throughout this course integrate the **Council for Exceptional Children (CEC)** professional preparation standards.
